Career Objective

CSE graduate from Green University of Bangladesh with a strong interest in Artificial Intelligence, Machine Learning, and AI Automation, supported by solid analytical and technical documentation skills. Proficient in MS Office and LaTeX for structured report preparation and systematic data management, I seek to contribute effectively to the Textile Department's BAC Accreditation Process through accurate documentation, organized data handling, and professional reporting, while continuously enhancing my technical and problem-solving abilities.

Skills

Coding	Python, JavaScript, C …
Databases	MySQL, PostgreSQL
Backend	FastAPI, PostgreSQL
Automation	n8n, API Integration.
Web Dev	HTML, CSS.
Tools	TeXstudio, Overleaf, MS Office, Google Colab, Netbeans, Git/GitHub.
Misc.	Academic research, teaching, training, consultation, LaTeX typesetting and publishing.

Education

2022 – 2026

Green University of Bangladesh, Dhaka, Bangladesh
Bachelor of Science in Computer Science & Engineering, CGPA: 3.70/4.0
Thesis title: *Computer Vision Based Real Time Air Quality Index Estimation From Satellite Image*

Al-Hera Academy School & College, Bera, Pabna
Higher Secondary School Certificate (HSC), GPA: 5.00/5.00
Secondary School Certificate (SSC), GPA: 5.00/5.00
Junior School Certificate (JSC), GPA: 5.00/5.00

Projects

Diabetes Prediction | FastAPI, Scikit-learn, Streamlit
Built a machine learning model to predict diabetes from patient health data. Designed and deployed a REST API using FastAPI on Render, and developed an interactive web interface with Streamlit.
Live Link: **check–diabetes.streamlit.app**

AI Health Advice Form – Basic Wellness Tips
Built an AI-powered form using n8n and integrated **OpenAI Chat Model** (using API token) to collect user info and send personalized wellness tips via email.
n8n Form Link: AI Health Advice Form

Projects (continued)

- **Cats vs Dogs Classification:**
  Built a CNN in Keras to classify images using Kaggle dataset.
  Google Colab: Cats VS Dogs
- **Handwritten Digit Recognition.**
  Implemented a ANN on MNIST achieving ∼97% accuracy.
  GitHub: Handrwritten Digit Recognition
- **Database Project.**
  Built a database system to manage and query structured data.
  GitHub: Library Management System
- **Digital Logic Design Project.**
  Designed a Binary-Coded Decimal (BCD) adder circuit
  GitHub: BCD Adder

Awards and Achievements

- **Department Dean's List Award**, Department of Computer Science & Engineering.
- **Department VC's List Award**, Department of Computer Science & Engineering.
- **Junior School Certificate (JSC) Scholarship**, Board of Intermediate and Secondary Education, Rajshahi.

Miscellaneous Experience

StudyWithMoniRuL (YouTube Channel) [Visit Channel]

2024 – Present

- Manage the YouTube channel that shares study materials and tutorials on programming, problem-solving, mathematics, and computer science to help students learn easily.

Mathematics Tutor (Calculus)

2022 – 2024

- Helped junior students understand key calculus topics and improve their problem-solving skills and academic performance.

Technical Documentation & Presentation Design (LaTeX)

2024 – Present

- Designed structured academic reports, IEEE-style papers, project documentation, and presentation slides using LaTeX with proper formatting, referencing, and graphical elements.
